

Shantanu Joshi

shanjosshi39@gmail.com +91 9936328758 Lucknow, India <https://shantanujoshi.vercel.app>

I'm Shantanu Joshi, an undergrad at IIT Jodhpur and builder at bits&bytes, dedicated to building systems that empower people with absolute freedom and ownership. I have no interest in the corporate status quo or iterating on legacy wrappers. Instead, my focus is strictly on engineering genuinely useful, original technology that makes a tangible impact.

Work Experience

Social Media Co- Lead - AWS Student Builder Group, IIT-J

Aug 2026 - Present

- Co-leading digital communications and campaign strategy across official platforms, executing technical storytelling initiatives to elevate community projects, workshops, and technical updates.
- Collaborating with cross-functional design and content teams to define and maintain a cohesive visual and narrative identity across all digital touchpoints.
- Directing content planning, campaign coordination, and live event coverage to scale student engagement and foster a builder-first technical community.

Head of Ground Operations – Bits&Bytes Foundation

May 2026 – Present | Lucknow, India

- Directed end-to-end logistics for 5 major events, coordinating a cross-functional team of 100+ members to achieve rapid infrastructure deployment and 100% on-time, on-requirements delivery.
- Translated high-level strategic vision into structured operational workflows, managing end-to-end execution across multiple teams to consistently meet 100% of project milestones and deliverable requirements.

Creative Contributor & Content Writer – Bits&Bytes Foundation

Apr 2026 – May 2026 | Lucknow, India

- Contributing to the narrative and communication architecture for a 1,500+ student dev collective.
- Translating complex AI and technical concepts into clear, high-impact content that drives engagement across the ecosystem.

Web Engineer – XFRUS AI

Jul 2025 – Nov 2025

- Led product management and frontend engineering for a post-incident cybercrime support system serving 1,000+ users, delivering MVP to production in 2 weeks to accelerate time-to-market for critical recovery workflows.
- Built optimized, secure web interfaces for recovery workflows and conducted comprehensive UAT, ensuring seamless functionality and reliability under high-pressure scenarios for 1,000+ end users.

Quantitative Research Intern – JPMorgan Chase & Co.

Jun 2025 – Jul 2025

- Analyzed loan books of 100,000+ records using dynamic programming to transform FICO scores into predictive categories, improving customer default probability estimation accuracy from 58% to 70%.

Generative AI Engineer Intern – Tata Group

Jul 2025 – Aug 2025

- Executed risk management and analytical EDA, built delinquency predictive frameworks, and engineered automated, agentic AI collections strategies to improve financial operations.

Education

Indian Institute of Technology, Jodhpur

Aug 2028

Bachelor of Science (BS) in Artificial Intelligence & Data Science

Relevant Coursework: Foundations of Data Science, Linear Algebra & Calculus, Probability & Statistics, Programming & Data Structures, Fundamentals of AI & ML, Ethics & Governance in AI

RLBMSSC, Lucknow – Lucknow, India

May 2024

High School and Intermediate School

Skills & Leisure Interests

Technical Stack & Tools : Artificial Intelligence, Data Science & Analytics, Quantitative Reasoning, Python, Machine Learning, Google Analytics, Google Campaign Manager 360, Digital Analytics

Execution & Strategy : High Pressure Problem Solving, Structural Chaos Management, Cross Disciplinary Collaboration, Rigid Execution & Analytical Discipline, Narrative Architecture, Crisis Management, Storytelling

Core Domains & Interests : Business Analytics, Digital Transformation, History of Computing, Science & Technology, English Literature, Football, Music
